01. AN INTRODUCTION

01.a

YOUR IDEAL ONE-STOP SHOP

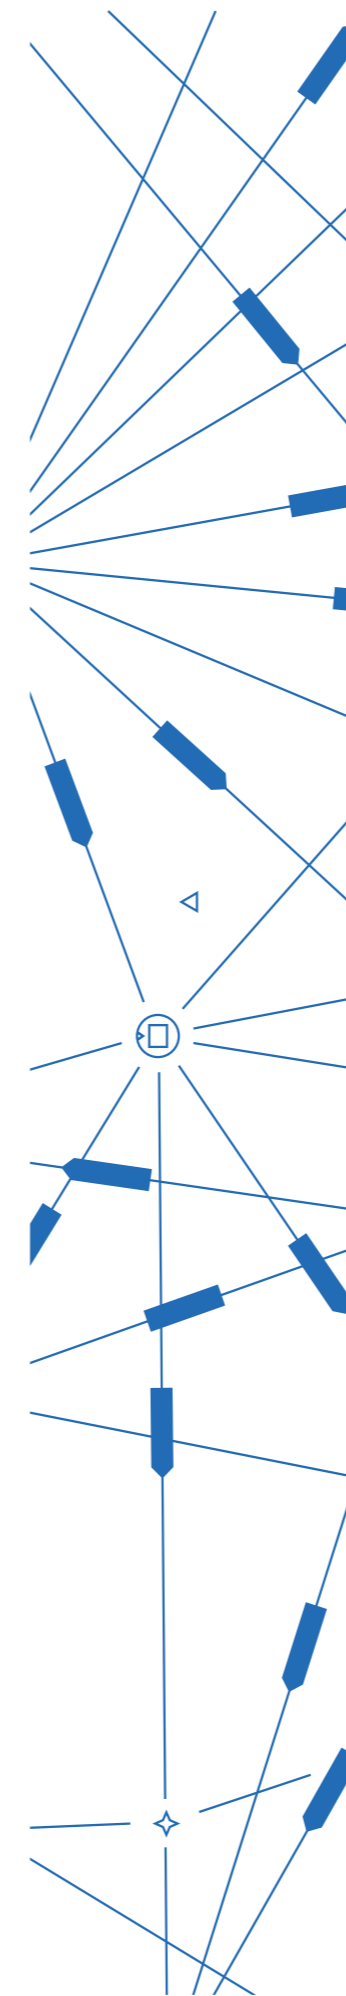

Infiniti Jet is an EASA approved CAMO [No. MT.CAMO.0104] allowing it to manage the continuing airworthiness of large, complex aircraft. Based in Europe and with a team of vastly experienced professionals within its network, Infiniti Jet is your ideal partner, able to manage and take responsibility for the technical aspects of keeping your aircraft airworthy and ready to fly when you need it.

Whether you are a private owner-operator who requires professional help with the airworthiness oversight, or a business jet owner requiring the full suite of services we offer - from management of the aircraft and crew, to catering and travel assistance, as well as fuel, maintenance, insurance and airworthiness oversight - we are ready and able to assist, wherever in the world your aircraft is based or flying to / from.

As a continuing airworthiness management organisation, we will ensure that your aircraft is maintained to the proper standards by appropriately approved organisations and in accordance with its approved maintenance program. We can provide support with the sourcing of spares, work planning, maintenance forecasting, maintenance oversight, defect rectification, maintenance programme development and authority audits.

Apart from managing the upkeep of your aircraft, Infiniti Jet can also take on the functions of a non-commercial operator under EASA Part-NCC. As the aircraft operator, Infiniti Jet will manage all operationally related matters including: crewing, personnel and flight records, flight planning and dispatch, organisation of handling services, provision of navigational data from industry suppliers, liaison with the authorities, and the like.

This makes Infiniti Jet your ideal one-stop shop, ensuring that your private aircraft is always at your disposal.

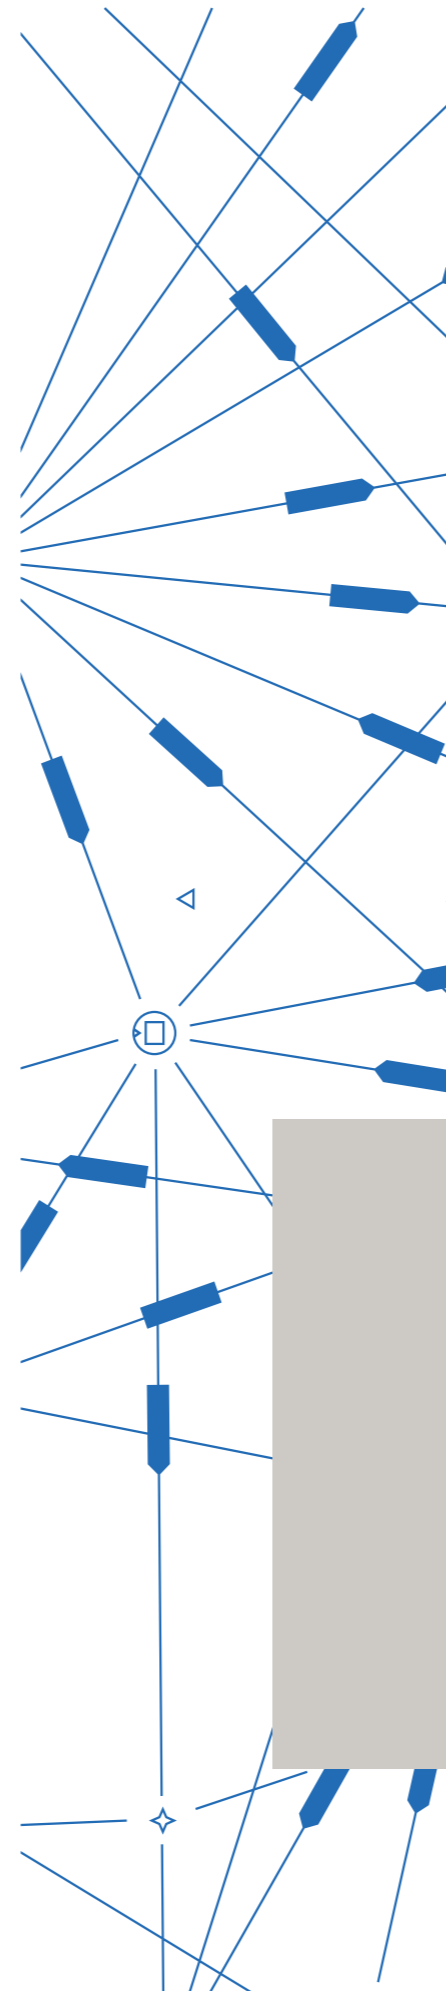

01.b

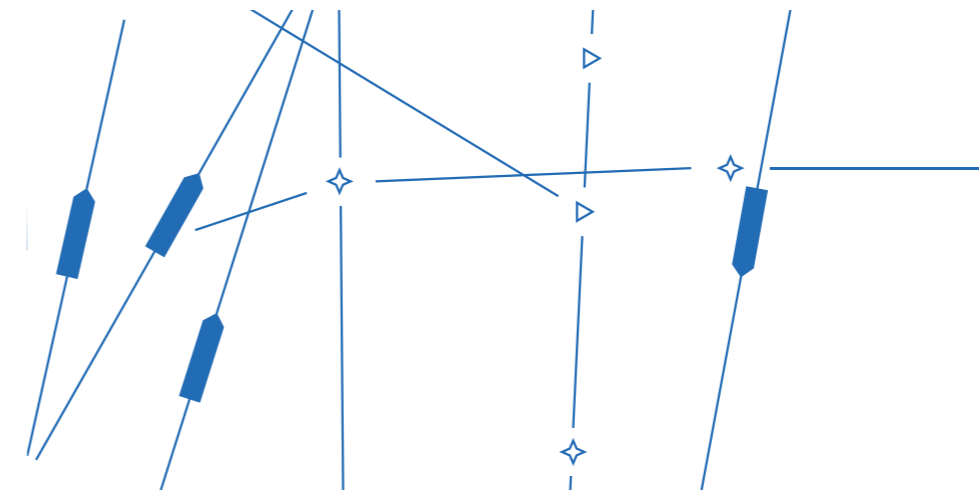

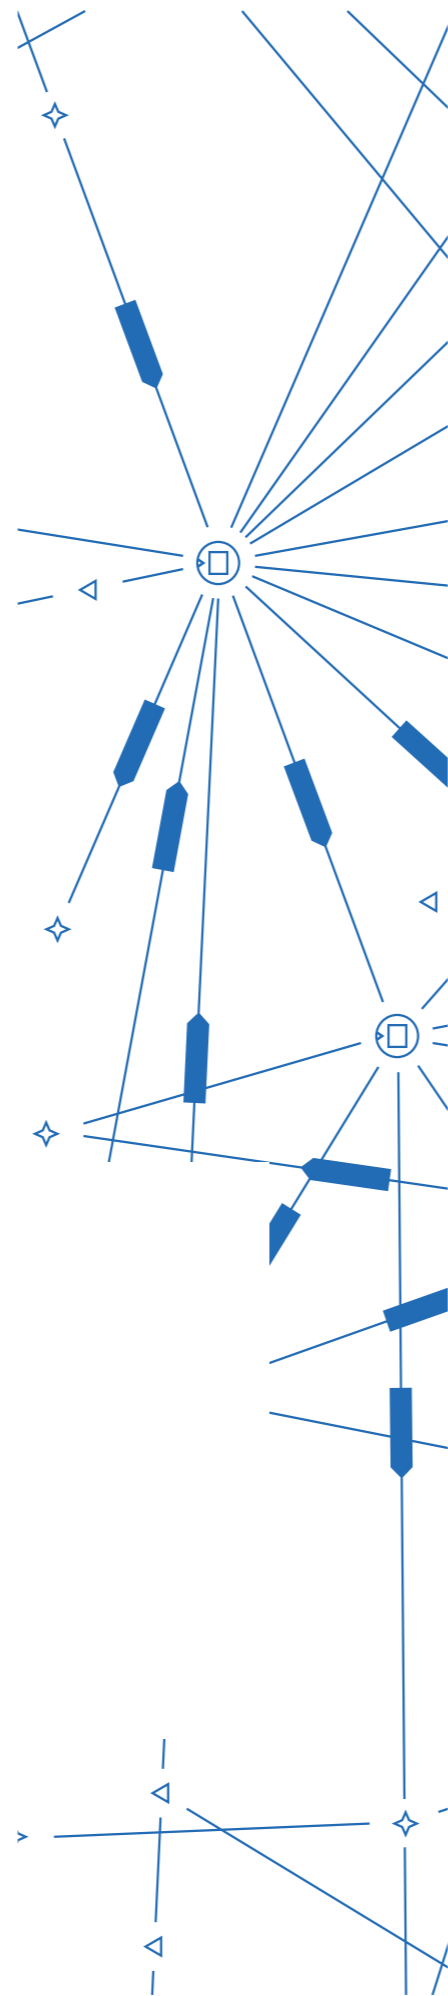

A FLEXIBLE APPROACH

Infiniti Jet is also able to manage and operate fractionally owned airplanes, making a private jet suddenly a lot more affordable and easier to invest in. As a co-owner of an Infiniti Jet operated aircraft, you will have access to the airplane, without having to bear the burden of the full costs associated with owning your own jet, and also without the myriad of tasks and responsibilities which you would otherwise have to manage.

Infiniti Jet also offers services to various airlines and organisations who are looking to outsource part of their ongoing operational requirements, including aircraft leasing companies, airlines, training organisations and flight schools, to mention a few. Our team would be happy to discuss any requirements you may have.

02. THE HIGHLIGHTS

The main areas of focus for Infiniti Jet are the following:

Full, end-to-end aircraft management for any private aircraft, including jets.

Covering airworthiness, crew, flight operations, onboard experience and airport experience.

Fractional Aircraft Ownership, full management and set-up for a consortium of aircraft owners.

From selecting the airplane, putting together the formalities of ownership shares, aircraft delivery, crew sourcing and management, maintenance and flight operations.

CAMO for owner-operated airplanes.

You fly it and enjoy it. We'll handle the paperwork and oversight.

CAMO and/or Full-Aircraft management for non-operational aircraft in a leasing fleet or stored airline units.

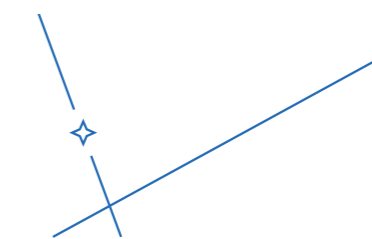

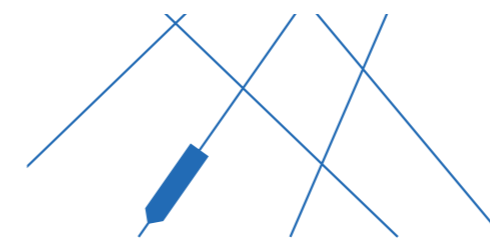

We assist leasing companies and airlines, and handle the continuing airworthiness for units not currently in active service under an AOC – wherever in the world the aircraft is stored. We also assist with delivery and/or end-of-lease processes.

CAMO and/or other support to Airlines, ATOs, Part-147s, etc.

Providing backend support to operators, allowing them to focus on their core business with peace of mind and cost-efficiency.

Access to a network of experienced professionals.

Through our team and network, we have access to professionals with experience on Bombardier, Gulfstream, Airbus, Boeing, and Embraer aircraft models, amongst others.

03. CAMO

Infiniti Jet holds an EASA Part-M Continuing Airworthiness Management Organisation (CAMO) approval [No. MT.CAMO.0104] allowing it to manage the airworthiness of large, complex aircraft, providing comprehensive airworthiness oversight and maintenance supervision for all of our managed aircraft.

Our in-house qualified CAMO team are on-hand round the clock:

Ensuring that compliance with all applicable civil aviation regulations and manufacturer recommendations are always met.

Performing technical audits/inspections of aircraft.

Monitoring all aircraft maintenance requirements, scheduled or unscheduled, and coordinating their execution by appropriately certified maintenance organisations in line with their respective approved aircraft maintenance programs.

Providing maintenance forecasts for forward planning.

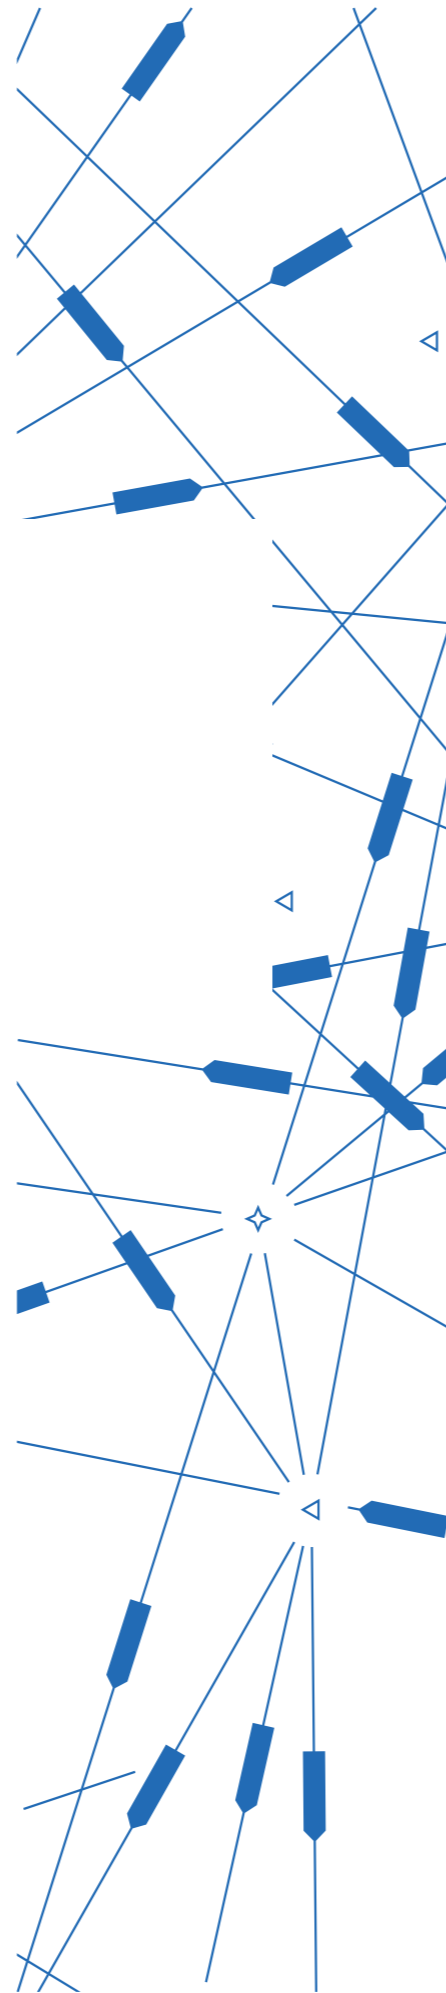

Maintaining effective cost control and reporting.

Extension of Airworthiness Review Certificates (ARCs) and the coordination of ARC reviews as applicable.

Reviewing, updating and storing of all technical records.

04. OUR NETWORK

04.a

PROFESSIONALISM AND SERVICE

As an EASA approved CAMO [No. MT.CAMO.0104], Infiniti Jet demonstrates the highest level of professionalism and service. Our team of experts is technically proficient and consists of customer-focused professionals who are dedicated to keeping our clients' aircraft in top working condition and ready to fly.

04.b

PARTNERS AND PROVIDERS

Our wider network of partners and providers around the world plays an equally important role within Infiniti Jet's operations. We work with maintenance organisations, aircraft manufacturers, parts suppliers, airport operators, fuel suppliers, regulators, legal firms, family offices and owners' representatives to make sure everything works like clockwork and that the airplane is safe and ready to fly when it's needed.

We are always keen to build relationships with partners around the world. Please do contact us if you have a client, as we could assist you with aviation matters, or if you are a supplier who feels that you can help us serve our customers better.
